VALUE OVER TIME

Our products and our support service are a guarantee of quality and reliability. By purchasing an Iperius Backup license you also have a professional support and consulting service. Updates are always free.

GUARANTEED

Extremely stable and lightweight software that is sold under a perpetual license, with no limitations or hidden costs, at the most competitive price on the global market.

IPERIUS SERVER

Many options for the best possible configuration: unlimited folders and destinations, e-mail notifications, execution of external scripts, system recovery, incremental backup, automatic backup.

MAIN FEATURES

Cloud Backup

Iperius can automatically send your backups to the most known an reliable cloud storage services, to easily have online backups on Google Drive, Amazon S3, Azure Storage, OneDrive, OneDrive For Business or Dropbox, with zip compression and AES 256 bit encryption. 256 bit.

Drive Image

Iperius can create images of the whole disk, to allow you to automatically reinstall the system in a few clicks (bare metal restore). The disk image is made without any interruption or reboot (hot backup), and you can also restore it to dissimilar hardware.

FTP Backup / Sync

Iperius is a flexible and lightweight software to make multiple FTP transfers, to and from unlimited servers. You can make FTP backups in both Upload and Download directions, with zip compression, FTPS, AES encryption and bandwidth limitation.

Backup all databases

Iperius is a powerful and easy-to-use backup software for Oracle, MySQL, MariaDB, PostgreSQL and SQL Server. It can make automatic backups, it supports compression and encryption of backup files and copying of backup files to any destination.

Backup ESXi / Hyper-V

A simple, lightweight and powerful VMware ESXi and Hyper-V backup software. Compatible with ESXi 4.x/5.x/6.x, hot backup without needing to turn off virtual machines, backup to network and tape, one low-cost license for unlimited ESXi hosts and virtual machines.

Exchange Backup

Iperius is a complete backup software for Exchange. It is extremely efficient and easy to use, and allows you to export Exchange mailboxes to PST files, make hot backups with log truncation and restore individual mailboxes. Compatible with

Tape Backup

Iperius is an agile and powerful software to backup your data to any tape drive (LTO, DAT, etc.). Compression, password protection with AES encryption, automatic tape ejection, restore of individual files.

Open file backup

Iperius can copy any file that is open or locked by other programs, thanks to its Volume Shadow Copy functions. This feature allows you to do hot backups of Outlook files (.pst), virtual machines, mail databases, etc.

Disk backup / network

Iperius can copy files and folders to any mass storage device, like NAS, external USB drives, RDX devices, computers in the network. Zip 64 compression, AES encryption, synchroniza-tion, and possibility to keep incremental backups.
